## **Jason Buchanan of Integra Technology Consulting Participates in Oracle 11g Release 2 Beta Test**

***One of twelve participants from around the world to spend the week with Product Managers and Developers at Oracle headquarters in Redwood Shores, CA***

**WALTHAM, MA, July 29, 2009** --- Integra Technology Consulting proudly announced that Jason Buchanan, an Associate Principal Consultant, has returned from a week of beta testing at Oracle corporate headquarters in Redwood Shores, CA. The beta test focused on exercising many of the new and enhanced features of Release 2 of Oracle's flagship 11g database. Testing was conducted alongside the Product Managers and Developers who are responsible for specifying, designing and coding the Oracle database product. The team was hand picked from customer sites - from as far as Australia - that had previously committed significant time and resources to testing and running Oracle 11g Release 1. Mr. Buchanan had extensive experience with 11gR1, having built 60 RAC environments, 14 DataGuard RAC environments and RMAN solutions for backup and recovery over the past 18 months. At the end of the week, Mr. Buchanan was recognized for logging the greatest number of bugs. Reflecting on his experiences with Oracle 11g Release 2, Mr. Buchanan said: "I was impressed with the significant advances in sophisticated features like ASM and compression. I was also impressed by the relatively few errors we found with the code, despite exercising it fully and heavily. I expect to see a production version of 11gR2 well before OpenWorld in October, and would encourage customers to take advantage of the many feature and performance improvements as soon as possible."

### **About Integra Technology Consulting**

Integra is a consulting and systems integration firm that combines real-world business experience with deep technology expertise to help clients achieve their strategic objectives, improve processes and maximize results. The firm has a legacy of Oracle leadership dating back to 1986, and focuses in three areas: Business Intelligence / Data Warehousing; Enterprise ERP and CRM applications; and Database / Technology architecture, systems development, performance tuning, upgrades and migrations. Integra has experience in the Financial Services, High Tech, Life Sciences, Manufacturing, Consumer, and Government/Education/NFP industries. [www.IntegraTC.com](http://www.IntegraTC.com)
